

Healthcare Solutions

Today's healthcare providers are faced with the challenge to constantly improve the quality, access and coordination of health systems and information. With deep-rooted industry experience and expertise, we deliver solutions that can help integrate healthcare systems and enable increased administrative and clinical efficiency, and improved patient care.

Added Value

We provide healthcare consulting services and solutions for the entire continuum of care. Our client list includes over 50 organizations across all sectors including:

- Government health ministries needing to enhance system access and accountability.
- Hospitals and health authorities seeking to improve integration and collaboration within their region and with provincial systems.
- Primary-care physicians who want to automate their practices and improve patients wellness.
- Consumers seeking to better manage personal health.

Expertise in Healthcare

Our Healthcare Solutions team includes over 300 practitioners, including strategists, consultants, physicians, RNs, and systems developers. We deliver innovation and insight to all sectors of the marketplace, while supporting transformational change across Canada within the healthcare industry. Working with our clients, we develop and integrate solutions in the following areas:

- Client and provider registries
- Interoperable electronic health records(iEHRs)
- Telehealth solutions
- Electronic medical records(for primary care physicians)
- Healthcare portals
- Strategic healthcare consulting
- Wait time and eReferral solutions

One of Canada's Most Trusted Business Solutions Providers

From forward-thinking iEHR (interoperable electronic health records) strategies and eHealth blueprints, to targeted eReferral applications, we are one of Canada's most reputable sources of information technology expertise. We draw on decades of industry experience and apply technology in ways that effectively connect system users and meet their most pressing information-management challenges spanning multiple Canadian jurisdictions. Our expertise is also backed by more than a century of telecommunications experience. Our expertise and experience allow for the creation of aligned, relevant, executable, and financially sustainable information technology that covers client needs, from strategy to systems development and implementation.

The Strength of Solid Industry Partnerships

In addition to working with leading technology providers and familiar platforms such as Microsoft® Windows, we partner with companies such as GE Healthcare, with whom we've developed the Clinical Management System, a fully-functional web-based electronic medical record (EMR) solution now being introduced in Canada.

About xwave Healthcare

One of the largest and longest-serving healthcare-consulting practices in Canada, **xwave** Healthcare's 300 consultants are guided by a Medical Advisory Board of physicians who provide direction and counsel on a voluntary basis. Together they develop solutions and services that connect providers with patients and promote efficiency across the entire continuum of care. They also, as part of Bell Aliant, offer the added support of Canada's largest provider of information and communications technology and digital security services. Bell Aliant serves a population of 5.3 million Canadians across Ontario, Québec and Atlantic Canada.
