

Department of Agriculture and Foods

Case Study

The Challenge

The Department's mission is "to lead the sustainable development of a competitive, consumer focused agri-food sector and to contribute to a vibrant rural economy and society". In pursuance of its mission the Department has chosen **xwave** to provide support in the development / maintenance of systems relating to animal health, food safety and market supports.

xwave's Solution

xwave's initial assignment in 2002 was to complete the implementation of the Department's PeopleSoft Human Resource MIS. We have continued to support this system, including providing numerous technical and functional training courses.

In the past three years **xwave** has also provided consultancy support to assist in the implementation of the Department's eStrategy. This includes supporting the development of the Department's Animal Identification Movement, ePotato Database, Dairy Certification and the Import Notification systems. **xwave** is also providing guidance for a number of enterprise IT initiatives involving geospatial data and technology to the Forestry Services.

The Benefits

xwave has made a positive impact throughout many areas of the Department. These include the provision of complete PeopleSoft HR implementation skills consisting

- Project management
- Infrastructure Planning
- Technical and functional HR expertise.

Database Specialists, Analyst Programmers and GIS consultants are just some of the **xwave** personnel who strive to ensure that the Department's maintenance and development staff are supported to the highest industry standard.

Key Technologies Applied:

- Java / J2EE
- Oracle Development
- GIS / Spatial
- PeopleSoft Human Resources ERP
