

# Telehealth Strategy

## Regional Hospital Authority

A Regional Hospital Authority needed to articulate the future long-term direction of its telehealth program through the development of a Telehealth Strategic Plan.

**xwave**, together with its telephony parent Aliant Canada, has an excellent understanding of telehealth strategies and implementation approaches. The company was asked to develop a 2003-2008 Telehealth Strategic Plan for the Regional Hospital Authority. **xwave** worked closely with the Telehealth Coordinator for the Region, consulted with the Senior Executive of the organization and other stakeholders to provide input to the strategy.
